

We are a 100% Panamanian Innovation Lab. Founded in 2018, we specialize in creating technological products that bring value to human beings. We combine creativity, design, and technology. Education, entertainment, and human behavior are our main focus.

Our Philosophy

HUMAN-CENTERED LEARNING

A focus on developing critical thinking, problem-solving, and creative skills that spark interest in education to transform the future.

ALGUNOS LOGROS

International Recognition

Recognition from the Smithsonian Institute HQ in Washington DC at its Folk Life Festival. Our "Agua Salud" project was selected for its significant impact on sustainability.

Research Advances

Created the largest 3D fossil library of fauna and flora in Latin America. This innovative tool facilitates the study and understanding of paleontology for students and researchers not only in the region but also around the world.

Gamification of Processes

Pioneers in the development of an innovative multiplatform that facilitates the comprehensive management of customs clearance processes for customs agencies specializing in medicines with precise and real-time tracking of operations.

OTROS LOGROS

Technological Innovation

Developed and adapted the REDCAP statistical analysis and prediction platform for the Vital Voices Foundation. This initiative allows for the prevention of future risk situations and improves the quality of life of communities.

Educational Impact

More than 19,000 students have learned with our 7 educational games. This achievement demonstrates our commitment to education and experiential learning.

Accessible Resources

We have created in synergy a series of dynamics, games, and platforms on sexual education in conjunction with the condom brand More.

Roble rosado
Tabebuia rosea

Mis flores pueden ser rosadas o blancas. Las abejas me ayudan a polinizar y el viento a dispersar mis semillas.
